RE: Approval for Biosolids Test Plots, Bingham Canyon Mine, M/035/002, Salt Lake County, Utah

Dear Mr. Fox:

The Division has reviewed your response to the Division's August 31, 1994 deficiency letter (received by the Division on September 29, 1994). This response has adequately addressed the Division's concerns.

The Division has received a copy of the EPA's approval for this project and understand that the Utah Dept. of Environmental Quality is also approving the project (DOGM has not received written confirmation as of this date). Once you receive their approval, you can begin construction of the test plots.

Thank you for your cooperation in this endeavor, we are looking forward to receiving the progress reports. Please call if we can be of further assistance.

Sincerely,

Lynn Kunzler  
Reclamation Specialist
